Nazar Yaremiiy

Software Engineer

04 PROFILE

Software Engineer who takes projects end to end: from a Figma design to deployment on my own server. I build websites, web apps, Telegram bots and ERP solutions with Next.js, React, Node.js, PHP and Python, and administer Linux servers with Docker and Nginx. I use AI tools such as Claude Code and OpenAI Codex every day in development and debugging.

05 EXPERIENCE

Software Engineer

Sep 2025 – Present

INIT ENERGY · Full-time

- Developed and maintained full-stack applications from scratch using Next.js, React, JavaScript, TypeScript, PHP and Python.
- Built the company website **init.energy** end to end: design, development, SEO and GEO, server deployment and domain setup.
- Deployed, configured and maintained Odoo ERP, including custom module development, performance optimization and new functionality.
- Administered Linux and Windows environments: server setup, configuration, troubleshooting and maintenance.
- Configured Nginx, HTTPS/SSL certificates, Docker containers and production deployment environments.
- Configured, maintained and optimized MariaDB databases.
- Developed and customized WordPress solutions with custom features and improved performance.
- Designed UX/UI interfaces and prototypes in Figma; optimized apps for performance, usability and technical SEO.
- Used Claude Code and OpenAI Codex to support implementation, debugging and development workflows.

Full-stack Developer

KOMAR

- Built the company website **komar.company** from scratch: design, development, SEO and GEO, server and domain.
- Product catalog, model comparison table, Ukrainian and English versions, order form. Other work is under NDA.

Programming Teacher

Dec 2023 – Jun 2024

HackITStudio · Part-time

- Taught HTML, CSS and JavaScript; planned and structured lessons with strong time management.
- Motivated students to think independently and creatively and helped them build confidence in problem-solving.
- Deepened my own understanding of programming through teaching and mentoring; developed programs and managed small projects.

06 SKILLS

Languages

JavaScript (ES6+) · TypeScript · PHP · Python · Java

Frontend

HTML5 · CSS3 · SCSS/Sass · Pug · jQuery · React · Redux Toolkit · React Router · Next.js

Styling & UI

Tailwind CSS · Bootstrap · Material UI · BEM

Backend & Mobile

Node.js · Express.js · Telegram bots · React Native

Databases

SQL · MySQL · MariaDB · MongoDB

DevOps

Linux/Ubuntu · Windows Server · Docker · Nginx · HTTPS/SSL

CMS & ERP

WordPress · Odoo ERP

Tools & AI

Git · npm · pnpm · Yarn · Postman · Gulp · Figma · Claude Code · OpenAI Codex

07 MENTORING

I teach programming in small groups and one-on-one: HTML, CSS, JavaScript, React, Next.js, Git and deployment.

08 ALSO

3D printing · 3D modeling · Video editing · Own Ubuntu server

09 PROJECTS

INIT ENERGY

init.energy ↗

Website for a solar power and backup power company. Sizing and payback calculators, two languages, product catalog, lead form, AVIF images. Design, development, SEO + GEO, server and domain.

KOMAR

komar.company ↗

Website for an electronics manufacturer. Product catalog, V5 model comparison table, video, two languages, order form with Signal and WhatsApp, Open Graph.

Moya Molytva

moyamolytva.online ↗

My personal prayer website: catalog, user-submitted prayers, personal lists and favorites, accounts, live online counter. Runs on my own Ubuntu server, which I administer.

Shop Bakery

GitHub ↗

Landing page for a bakery franchise built without frameworks: native <dialog>, CSS scroll-snap carousel, WebP images cut from ~2.1 MB to ~0.3 MB, lazy-loaded map, accessibility.
